

ERN-EYE WORKSHOP ON GENETIC TESTING

ERN-EYE Project Management Team

23/10/2018

Satisfaction Survey

After a first workshop devoted to ontology last year, ERN-EYE organized a second one on genetic testing from 10th to 12th October 2018 in Florence, Italy. The workshop gathered nearly 100 people from the HCPs of the 13 member states of the network, as well as invited speakers. The first day of the workshop was dedicated to the situation for genetic testing across the member states partners of ERN-EYE.

The second day was devoted to the clinical practice, the genomic diagnostic and the future issues for the genetic testing group in the ERN-EYE.

The last day made it possible to draw conclusions of the meeting is going to end with a final round table opening the debate on research in this field in Europe.

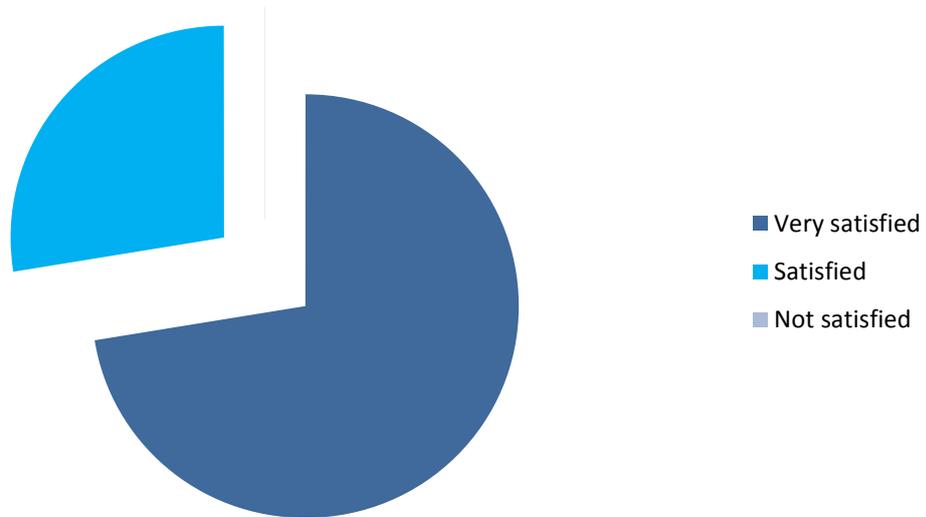

This workshop was the opportunity to discuss the needs, challenges and issues of the network about genetic testing.

Many participants responded to the satisfaction survey following the meeting. The results showed that the participants were overall rather very satisfied with the meeting. The only point that was mentioned is that some participants found the workshop too long.

This will be particularly taken into account for the next meeting that will be held in Prague and will last only one day and a half.

In the following graphs, you find all the answers of the survey in the detail.

The meeting was generally well organised

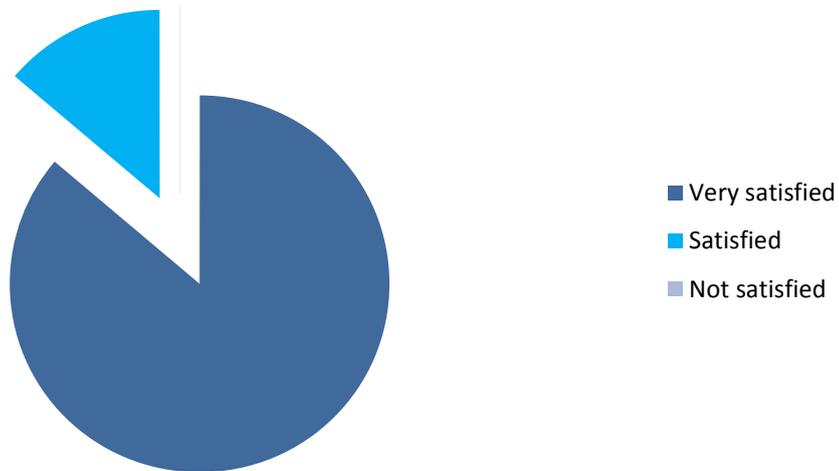

The duration of the meeting was

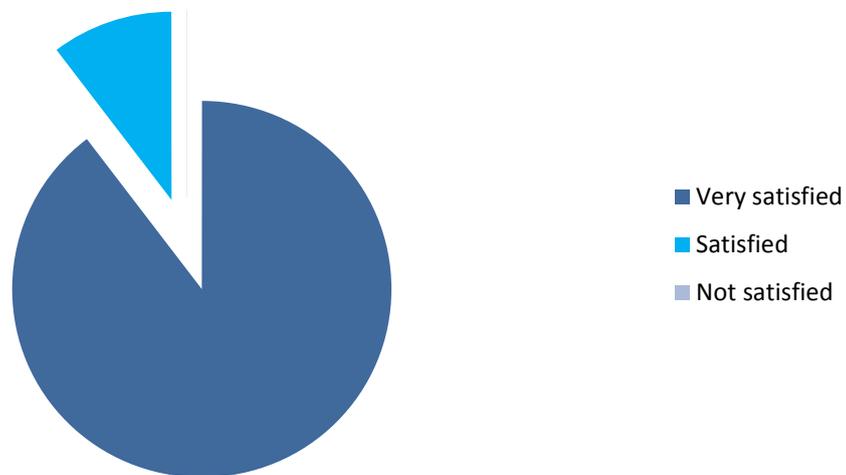

We noted that the participants were generally satisfied with the progress and organization of the workshop. However, the duration of two days and a half seemed too long for some of them.

Meeting registration was efficient and straightforward

Meeting staff/officials were generally helpful

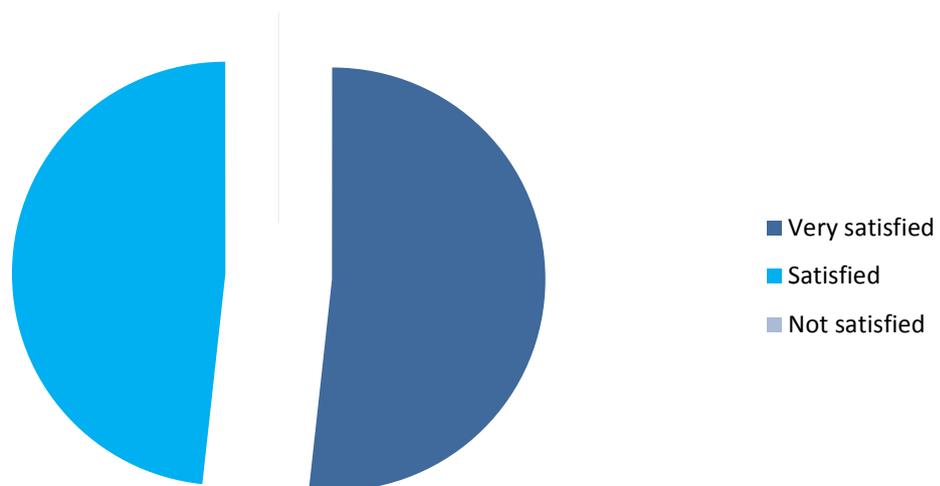

The ERN-EYE team is doing its best to help participants during registration and on site at meetings. For future meetings, we will continue to do to the maximum so that each participant receives all the information they need.

What is your satisfaction about the rooms ?

What is your satisfaction about food ?

The rooms and the food made it possible to satisfy almost all the participants.

The meeting sessions offered valuable insights for ERN-EYE

The meeting outputs will be useful to my work and my work related to ERN-EYE

The goal of the meeting was to set up a definition of the genetic testing needs in the ERN-EYE member countries, as well as the next issues for ERN-EYE in the coming months on this subject. In view of the results mentioned above, it seems that the objective has been achieved, even if some participants were not able to advance as much as they would have liked in the working groups.
