

ERN-EYE General Annual Meeting Tallinn

ERN-EYE Project Management Team

04/04/2018

Satisfaction Survey

After one year of existence, ERN-EYE organized its third important meeting from March 26th to 27th 2018 in Tallinn, Estonia. The General Annual Meeting gathered nearly 60 people from the HCPs of the 13 member countries of the network, as well as invited speakers.

This meeting made it possible to fix the goals for the year 2 of ERN-EYE and allowed to continue an active collaboration within the overall network and the working groups. The result of the progress of the work will be presented during the next meeting, a workshop dedicated to genetic testing, that will be held in Florence from the 10th to the 12th October 2018.

Many participants responded to the satisfaction survey following the meeting. The results showed that the participants were overall rather very satisfied with the meeting. The only point that was mentioned is that some participants were not able to advance as much as they would have liked in the working groups.

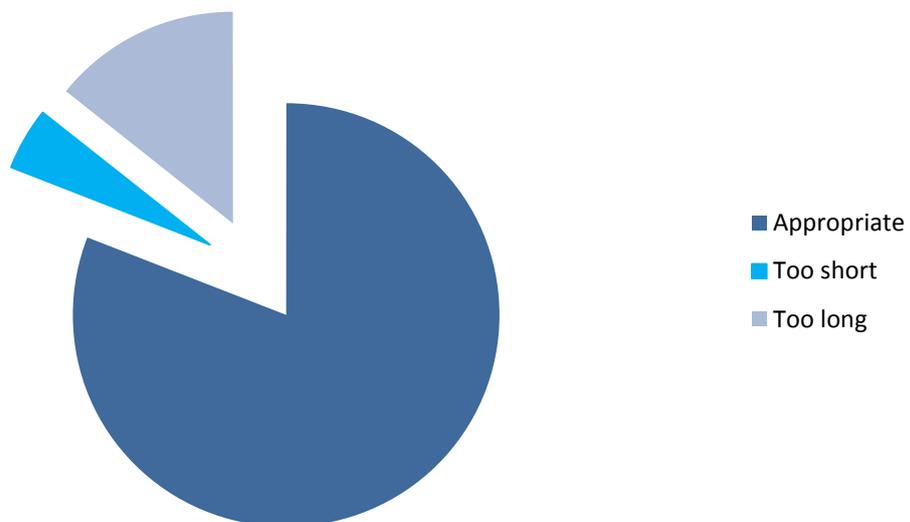

This will be particularly taken into account for the next meeting that will be held in the Hospital of Florence and will last two days and a half.

In the following graphs, you find all the answers of the survey in the detail.

In general, the meeting lived up to my expectations

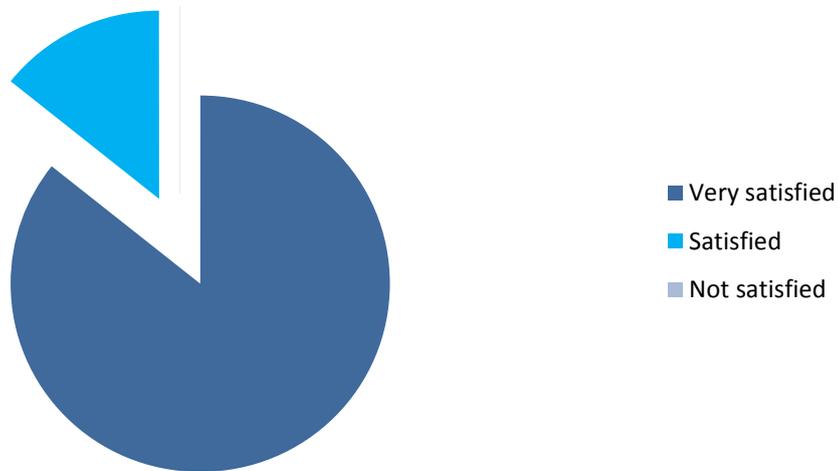

The duration of the meeting was

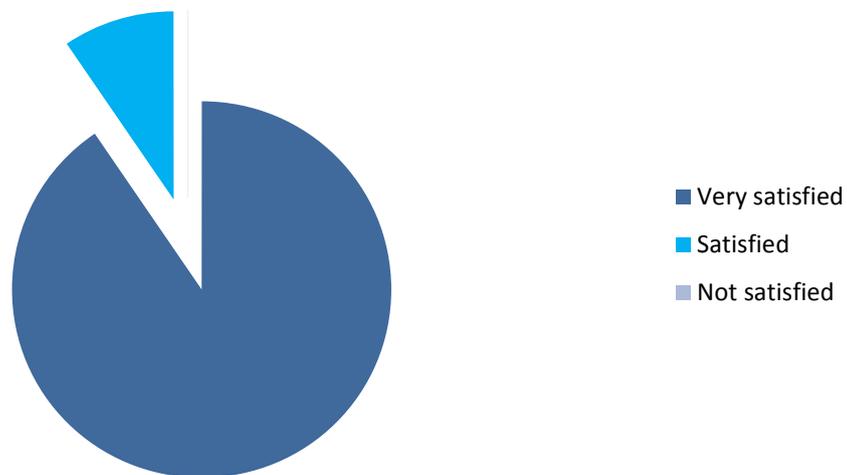

We noted that the participants were generally satisfied with the progress and organization of the General Meeting. However, the duration of two days seemed too long or too short for some of them.

Meeting registration was efficient and straightforward

Meeting staff/officials were generally helpful

The ERN-EYE team is doing its best to help participants during registration and on site at meetings. For future meetings, we will continue to do to the maximum so that each participant receives all the information they need.

The quality of the sound in the meeting rooms was good

Internet access was good and reliable

The internet access and the sound were much better in Tallinn than in Mont Saint-Odile and the results of the satisfaction survey is much more positive about those points.

The meeting sessions offered valuable insights for ERN-EYE

The meeting outputs will be useful to my work and my work related to ERN-EYE

The goal of the meeting was to provide the opportunity for all participants to work together, give them the opportunity to advance in their work, as well as to provide them with useful documents and content. In view of the results mentioned above, it seems that the objective has been achieved, even if some participants were not able to advance as much as they would have liked in the working groups.
