

CLINICAL TRIAL

SOLSTICE

Research

A Long-term Follow-up Study to Evaluate the Safety and efficacy of Retinal Gene Therapy in Subjects with choroideremia treated previously with Adeno-Associated Viral Vector Encoding Rab Escort Protein-1 (AAV2-REP1) in an Antecedent Study

Rare Eye Disease concerned by the trial :
Choroideremia

Status of the trial : active, recruiting

Orphan drug recognition : Yes

Inclusion criteria : Subjects are willing and able to give informed consent for participation in the study, and have received a sub-retinal injection of AAV2-REP1 for CHM in an antecedent study.

Exclusion criteria : There are no exclusion criteria for this study.

Inclusion opening date : 01/01/2017

Inclusion closing date (previsional) : 31/12/2018

Children

Adults

Within ERN-EYE members

Principal location of the trial :

Center for Ophthalmic Research, University Hospital of Tübingen

Elfriede-Aulhorn-Str. 7
72076 Tübingen
Germany
