How to access the CPMS ?
Verification method

Clinical Patient Management System (CPMS)

The CPMS aims at supporting ERNs in improving the diagnosis and treatment of rare or low prevalence complex diseases across national borders of Member States in Europe.

The CPMS is a secure Software as a Service (SaaS) that enables health professionals to enroll patients using comprehensive data models. Health professionals can use the CPMS to collaborate actively and share patient within and across ERNs.

The CPMS is supported by Virtual Communication Tools and DICOM viewers to facilitate the interaction between clinicians. Reporting tools are among the functionality of the system to seamlessly empower users to generate reports of interest for administrative and clinical purposes.

The site may change as we endeavour to incorporate suggestions from our Clinical Advisors, particularly in the area of Graphics and Reporting.

Working for patients with rare, low-prevalence and complex diseases
Share.Care.Cure.

You will have 3 different methods for verification before connecting to the CPMS:

With a mobile device

With internet connectivity:

1) **EU Login Mobile App PIN code** – If the mobile device where your EU Login Mobile App is installed has internet connectivity then you can use the "EU Login Mobile App PIN Code" verification method. You will have to enter a 4 digits PIN code into the EU Login Mobile App in order to connect to EU login. This is the PIN code that you have chosen while registering your mobile device into EU login.

Without internet connectivity

No Internet Connection

1) **EU Login Mobile QR Code**: If the mobile device where your EU Login Mobile App is installed does not have internet connectivity then you can use the "EU Login Mobile App QR Code" verification method. You will need to scan a QR code using the EU Login Mobile App in order to get a one-time password, which you then introduce while connecting from your PC.

ERN-EYE Helpdesk

 Without internet connectivity

No Internet Connection

2) Mobile phone + SMS – Your mobile phone allows you to connect to EU login by receiving an SMS, if your number is registered in your EU login account. In some countries, you might not receive the SMS and should rather use another verification method.

Sign in with an EU login account using the EU Login Mobile App PIN code:

Select "**EU Login Mobile App PIN Code**" as the verification method, enter your password in the "**Password**" field and click on "**Sign in**". Sign in

EU Login Mobile App PIN Code

2: **Type password**

1: **Select**

3:**Click**

Sign in

If you have more than one device with an initialised EU Login Mobile App, you are asked to select the one you would like to use. This left screen does not display if you have only initialised one device. Click on the device using the name you provided.
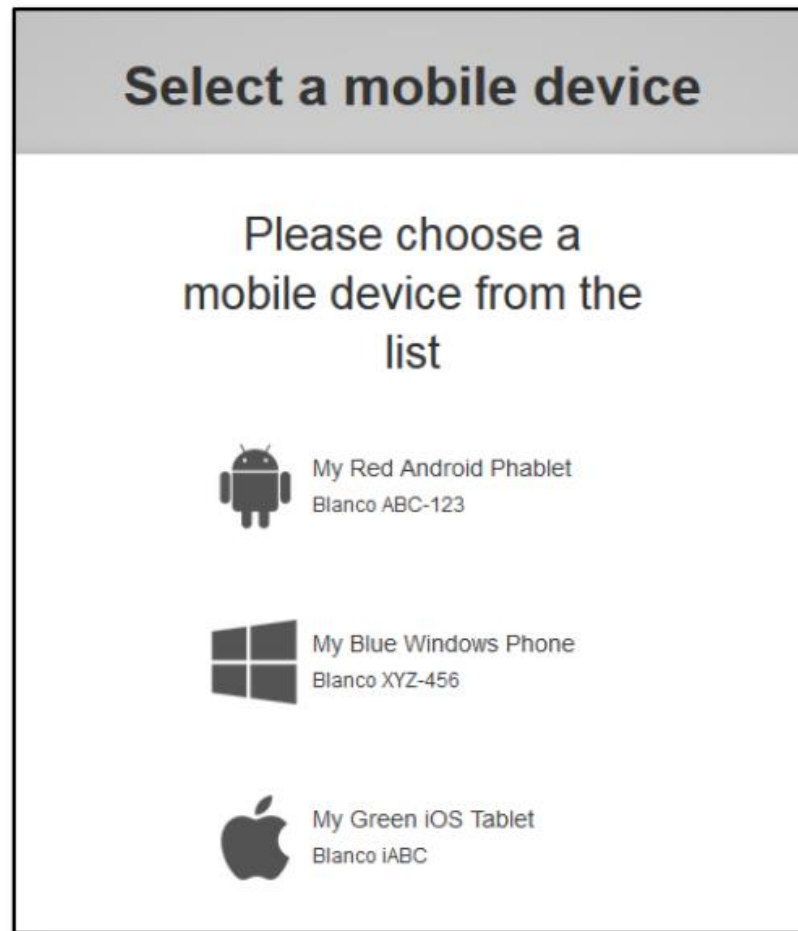

EU login sends a notification to your mobile device. Tapping on the notification triggers the launch of the EU Login Mobile App.
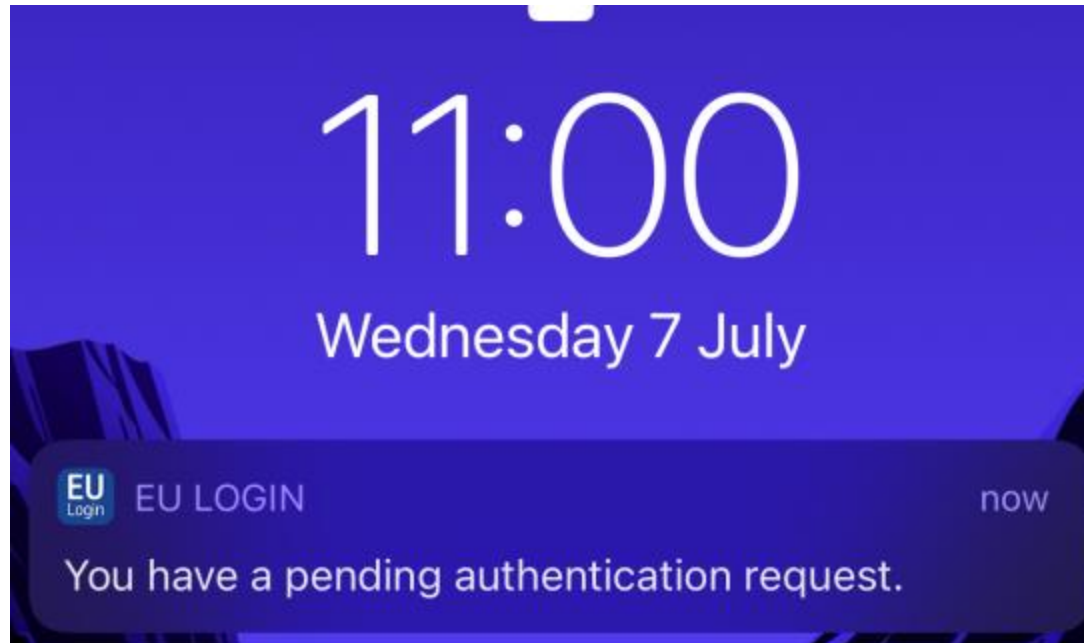

The EU Login Mobile App prompts you to enter your PIN code. Enter your PIN code and tap on "Authenticate". This automatically completes the process on your PC that proceeds to the service you requested to use.

EU Login Mobile App QR Code
Generate a one-time-password with the EU Login Mobile app.

A QR code is displayed on screen.

Start the EU Login Mobile App on a mobile device where it has been previously initialised. Tap on "Scan QR Code"
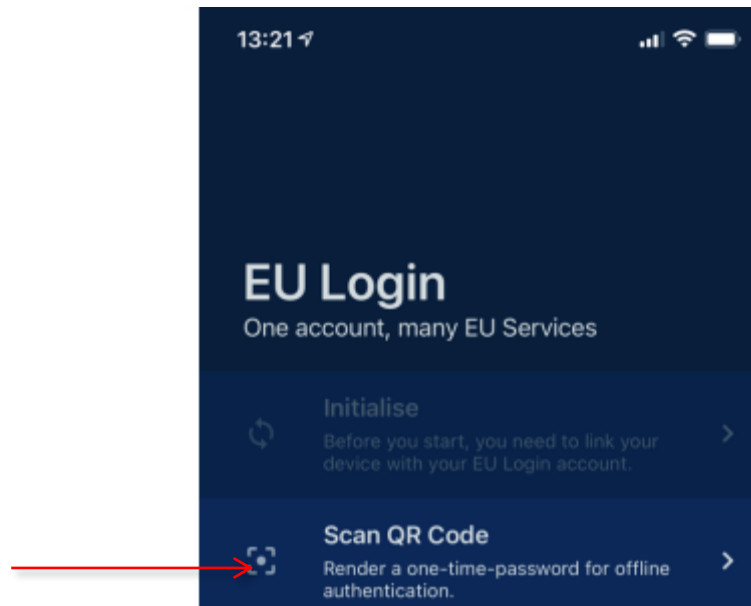

The QR code scanner starts on your mobile device. Point the camera of your mobile phone to your PC screen until the QR code is recognised.
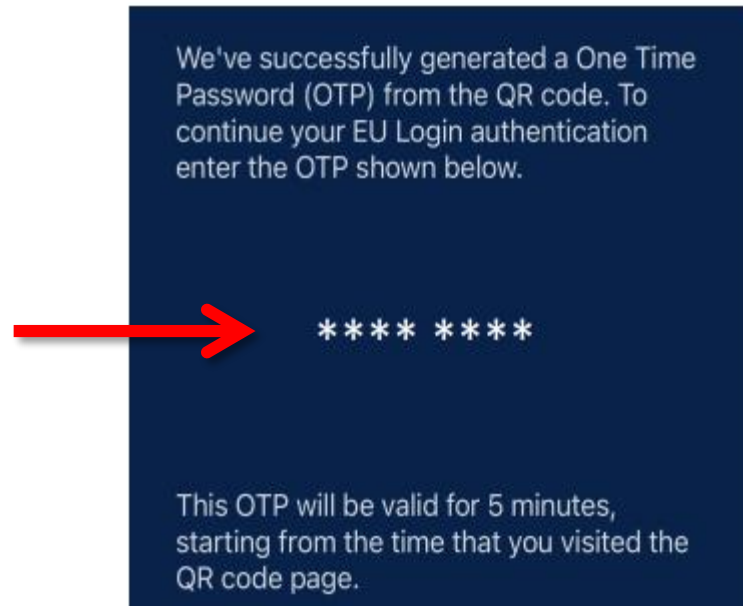

The EU Login Mobile App displays a one-time password composed of **digits and characters** .

We've successfully generated a One Time Password (OTP) from the QR code. To continue your EU Login authentication enter the OTP shown below.

**** ****

This OTP will be valid for 5 minutes, starting from the time that you visited the QR code page.

Type the one-time password in the "code generated by your app" field and click "**Sign in**" to proceed to the service you requested to use.

Sign in with an EU login account using Mobile Phone + SMS

Select "Mobile Phone + SMS" as the verification method.
